### TECHINICAL DATA SHEET

<b>Product Name</b>	<b>Magnesium Acetate Anhydrate</b>	
<b>Synonyms</b>	Aceticacid; Magnesium salt (8Cl, 9Cl); Magnesium Acetate (6Cl, 7Cl); Cromosan; Magnesium Diacetate	
<b>CAS No.</b>	142-72-3	
<b>Molecular Formula</b>	<b>Mg(CH<sub>3</sub>COO)<sub>2</sub></b>	
<b>Molecular Weight</b>	142.39	
<b>Packing</b>	25kg bag	
<b>Quantity</b>	22MT/20'FCL	
<b>Specification</b>	<p>Appearance: White crystal powder  Purity: 98% min  Magnesium(Mg): 16.5% min  PH(5% Solution): 7.0-11.0  Chloride(Cl): 50 ppm max  Iron (Fe): 10ppm max  Calcium(Ca): 100 ppm max  Heavy Metal(Pb): 10ppm max</p>	
<b>Application</b>	<ul style="list-style-type: none"> <li>-Widely used in feed additive and cosmetic.</li> <li>-Used to make magnesium acetic acid uranium acyl which is used to test the sodium.</li> <li>-Used in medicine, industry, it can be used to get rid of the funk and kill the bacteria and antiseptic and the coloration of drygoods, eosin dyeing, the fixation of nigrosine etc.</li> </ul>
